

Dentagen Aqua **For cats and dogs**

Ingredients

Purified water, glycerine, sorbitol, propyleneglycol, rheum palmatum (source of RF2), methylparaben, sodium saccharinate, propylparaben, colour.

Description

Dentagen Aqua is a palatable drinking water additive that maintains the concentration of the active principle RF2 in the mouth throughout the day.

Suitable for cats and dogs, Dentagen Aqua freshens breath by providing continuous protection against plaque formation.

RF2 is not bactericidal and allows the natural and healthy mouth and gut flora to exist without promoting dental disease. It is imperative that the level of water consumption in cats is sustained to maintain renal function

Instructions

For dogs > 12kg add 10ml (1 capful) of Dentagen Aqua to 1 litre of fresh drinking water.

For dogs and cats < 12kg add 5ml (1/2 capful) of Dentagen Aqua to 500ml of fresh drinking water.

Replace with fresh Dentagen Aqua solution every 24 hours

Precautions

Keep out of reach of children. Keep out of direct sunlight. Store in cool dry place. For veterinary use only.
